

Crypto Index Token

A never seen crypto opportunity!

What is this Crypto Index Token project?

CIT is the very first ICO that will combine everything that the crypto market has to offer. We combine ICO, trading, holding, mining and an passive opportunity in 1 project. This will all be implemented in our CIC coin:

When you join CIT you will actually be involved in trading, mining and in the current existing crypto market.

Buying CIT means you are involved in 30+ different existing crypto currencies.

CIT will be the first currency that is fully asset backed and it's value will be completely determined by our holdings, trading and mining. The REAL value of CIT will not be determined by supply/demand, hype, news, pump and dumps.

We will be the very first coin that will have a REAL asset backed value at any time.

OUR MAIN GOAL -> exclude the volatility of the current crypto market and give CIT members a safe, secure and transparent opportunity to join the crypto market.

What is still the main reason a lot of investors stay out of the crypto market?

VOLATILITY!!!!!!

Why are we launching CIT?

EXCLUDE VOLATILITY

SAFE HAVEN FOR INVESTORS

A COIN WITH A STABLE GROWTH

GUARANTEED FUTURE PROFITS

How do we manage to create a stable and secure coin?

If you have several external sources you can manage to create a token that will have a stable and sustainable future growth.

Our coin will function like an index. The value of an index is calculated on the average price of all assets that are backing the index. With enough assets behind CIT we create a coin that has a REAL value and a value that is fully determined by its assets and not by external factors like supply/demand, pump and dump, news, hype or any other thing.

Unlike other ICO or projects we don't use raised money for development, team bonuses, marketing or any other purpose. Except for 10% we hold for supporting our affiliate system, 90% of the raised funds are invested into the current crypto market and mining, which will give CIT a real value from the very first minute we go live.

Distribution of funds (10% for affiliate system deducted)

RAISED FUNDS ALLOCATION

LONG TERM PORTFOLIO

SHORT TERM PORTFOLIO

MINING

LONG TERM PORTFOLIO.

Our long term portfolio can be considered as our company vault and base for our project. 45% of the raised funds will be held in this portfolio and will stimulate the value of our coin on the long term.

Our vault will consist of 30+ different existing crypto currencies. We only choose existing currencies that already have proven to be a good coin with a professional development team or in coins that have potential to increase significantly during the coming years.

We will only sell coins from our vault if they grow by 100% or more. But we will only sell a small percentage if they reach our goal and keep the remaining for higher future growth.

The only exception when we would sell long term coins is when they make a sudden explosion in value and have dramatic positive impact on our total long term holding value.

To safe guard our long term holding value we will always keep 50% of holdings in BTC or ETH. The reason for this is to be able to anticipate any crashes in the entire alt coin market. If this ever happens we will always have funds reserved to buy into the market and stabilize the value of our CIT.

SHORT TERM PORTFOLIO

With our short term portfolio we will trade on a daily basis to make daily profits on the volatility of the market.

The money we spend on this portfolio will be used to trade any currency that is available on at least one of the larger exchanges.

We will trade:

- Crypto/usdt markets.
- Trade on the same coins we hold in our long term holdings.
- Trade on any other coin that can generate potential profits.

We will always keep a certain amount in BTC for:

- React on sudden drops (blood baths)
- Put extra buy orders.
- And use remaining funds to place buy and sell walls so we can influence the market.

1/2 of the weekly profits will be distributed to all members that hold CIT tokens in our program. In this way we create a passive return for our members.

The other half will be added to our long term portfolio on a weekly base. In this way our long term holdings value will not only increase when our assets value increase but also the volume of our long term holding will increase on a weekly base.

MINING.

This extra source of income will support the REAL value of our coin.

As soon as we launched the farm, our mining profits after deduction of expenses will be distributed in the following way:

- ➔ 45% will be used to expand our mining capacity**
- ➔ 25% will be added to the members passive returns (paid monthly)**
- ➔ 30% added to the long term portfolio**

How is CIT price determined and how will it grow in value?

3 ways increases the REAL value of CIT.

INCREASE OF THE VALUE OF OUR LONG TERM PORTFOLIO

50% OF OUR WEEKLY TRADING PROFITS WILL GO TOWARDS OUR LONG TERM PORTFOLIO. IN THIS WAY WE CAN INCREASE THE VOLUME OF OUR LONG TERM HOLDINGS.

MINING. AS SOON AS WE EXPAND OUR BUSINESS WITH OUR OWN MINING FARM 45% OF THE MINING PROFITS WILL BE ADDED TO EXPAND OUR MINING CAPACITY AND 30% WILL BE ADDED TO OUR LONG TERM HOLDINGS.

VALUE OF 1 CIT

VALUE OF LONG TERM PORTFOLIO + VALUE SHORT TERM PORTFOLIO + MINING

TOTAL AMOUNT OF CIT IN CIRCULATION

Only the amount of tokens bought by members and in circulation have the value of above calculation. Only purchased tokens have a real value that is backed by our holdings. Unsold tokens stay in the company and don't have any value until purchased into circulation.

**3 WAYS TO EARN
WITH CIT!!!!**

AFFILIATE MARKETING

PASSIVE WEEKLY RETURN FOR 1 YEAR

**RECEIVE YOUR CIC COIN AND TRADE
THEM ON EXTERNAL EXCHANGES.**

1. Affiliate Marketing

10% of raised funds during ICO and 10% of all purchases post ICO will be used to support our 6 tier uni level affiliate system.

We reward our members every time a team member purchases CIT and we pay 6 levels deep. You can have an unlimited amount of direct and indirect referrals in every level.

We pay:

Level 1	5%
Level 2	3%
Level 3	1%
Level 4	0.5%
Level 5	0.3%
Level 6	0.2%

All commission will be paid directly into your BTC account in your dashboard.

You can withdraw your commissions to your personal wallet or you can use commissions to purchase more CIT to increase your passive earnings.

Withdraw requests are handled within 72 hours after request is submitted.

2. Earn Passive with Trading and Mining.

Earn a weekly passive income on your CIT holding's through our trading and mining.

-50% of the weekly profits of our short term trading will be distributed to everyone that has CIT tokens in our program.

-25% of the profits made with our mining farm will also be distributed to investors.
(mining profits expected second half of 2018)

OUR GOAL IS TO RETURN 5% WEEKLY PASSIVE PROFITS TO OUR INVESTORS. THIS IS **NOT A GUARANTEE. WE DO **REAL** TRADING AND WE WILL DO **REAL** MINING. SO WE CAN'T GUARANTEE A FIXED WEEKLY RETURN!!!!**

Our passive program runs for a minimum period of 90 days and a maximum period of 1 year. After 90 days you are able to sell back your CIT to the company.

After 1 year your passive earnings expire and company will buy back your CIT at the current value of CIT.

3. Receive your CIC coin.

First quarter of 2018 our CIC coin will be delivered with external wallets, private blockchain. By that time we are going to be listed on at least 1 external exchange so you can start trading your CIC coin from the minute you receive it.

You will receive 1 CIC coin for every CIT token you hold on our platform at the time of distribution.

1 CIT token

1 CIC coin

Long term goals for CIC coin and CIT token?

In the near future we are going to build a real crypto environment around our CIC coin and CIT token.

CIC:

- External people can only enter our mining opportunity by paying with CIC.**
- We are going to launch gaming, betting and poker sites where people can play for CIC.**
- We are going to launch an advertising site where people can advertise everything by paying CIC.**
- We are to launch a webshop where people can purchase and services and use CIC as a payment option.**
- Build out our merchant platform.**
- We are going to launch our own exchange platform with our own crypto debit cards. You will be able to top up your debit card with CIC and other currencies and spent them everywhere where VISA/Mastercard is accepted globally.**

In the near future future you will be able to use CIC for everything that you now can do with €/\$. We want CIC to become a well known and common used currency as payment method worldwide.

CIT:

We want CIT to become the largest, strongest, most stable and solid passive crypto earning project across the globe.

2 Types of Membership

We have 2 types of membership. Reason for this is that we do not take any money from the raised funds to support our marketing, pay bounties, pay our team, etc.

We offer a free and a pro membership.

Free member:

As a free member you can purchase CIT tokens and benefit from the weekly profits, earned commissions and receive your CIC coin after 90 days.

But as a free member you can only use your passive earnings and commissions to reinvest in extra tokens. To be able to withdraw passive returns and commissions you will have to upgrade to pro member and pay the yearly 25\$ fee. This annual fee can be paid directly or can be paid with your account balance.

Pro member:

As a pro member you immediately have access to all functions. You will be able to withdraw your earnings and commissions from the start.

We recommend everyone to pay the 25\$ fee when they sign up to be able to withdraw earnings from the Start. But for people that can't afford you can already earn passive and commissions and pay your fee with your earnings.

One of our keywords, TRANSPARENCY!

Our team will be as transparent as possible on every aspect of our opportunity.

- As soon as we have our full time team we will introduce everyone on our website.**
- Our board members as well as our traders will regularly pop up in videos, webinars, trading sessions.**
- According to sources of income. We will have a public profile on www.cryptocompare.com where all members will be able to track our complete long term portfolio. Besides this we will post our trading results on a weekly basis.**
- We will regularly broadcast live trading sessions.**
- As soon as our mining operations start we will also deliver transparency about its progress and will give the opportunity to visit our mining location and meet the technicians and owners.**

WHY ARE WE UNIQUE?

Everyone knows the crypto market is volatile. As soon as our CIC coin gets listed on external exchanges it will have a speculative value as any other coin. But because our coin is completely asset backed by the existing crypto market, trading and mining our coin will always have a real value higher than the value you once paid when joining CIT.

2 options:

-Speculative price on external exchanges is **higher** than the current real value. Very nice you can sell your coins for profit and you make a positive return on short term.

-Speculative price on external exchanges is **lower** than our real value. No worries you will never lose a dime because we can buy back your CIC at any given time at the current REAL price.

So people that join CIT are always guaranteed of making profits on their investment even when the public price of CIC would drop to '0'. And this makes us unique. There is not a single other coin that guarantees A REAL value at any time.

How can I sell back my coins to the company?

To be able to first guarantee a solid basis and growth this feature will unlock on the 1st of June 2018

IMPORTANT!!!!!!!

-We only guarantee buy back to people that contributed to our company. So Only members of the CIT platform that hold CIC tokens will be able to benefit From the buy back option that we offer.

Reason: We only want to reward the people that helped us to develop our opportunity and not the ones that
Only use CIC as a coin to trade with.

-We only buy back the amount lower or equal to your backoffice CIT balance.

Reasons:

- members will be willing to hold their coins for a longer period what makes our speculative value grow.
- If you sold your CIC on an external platform it means you already sold with profit and we will not cover your investment because you already earned back your investment.
- We don't cover more CIC than your CIT balance in your dashboard Because you probably bought extra coins at a cheaper value than the real value.

- Selling your CIC back to the company automatically reduces your CIT balance In your dashboard which results in loss of weekly passive income.

Reason:

If the company buys back CIC it means that we have to take money out of our assets to pay you back. So Money is going out of our holdings which can't produce any more passive returns.

CIT ICO

ICO Details

Total supply of CIT tokens

30.000.000 CIT

POS token

proof of stake. CIT can't be mined

ICO crowdsale supply

7.500.000 CIT
